

ControlScan Certifies DickFergusons.com As A Safe Shopping Site

In an effort to increase its Internet security, DickFergusons.com, the leading retailer of better men's clothing, today announced that it has become certified by ControlScan.

For Immediate Release

MARIETTA, Ga./EWORLDWIRE/May 9, 2006 --- As a measure to increase privacy and security and to prevent hackers and thieves from accessing sensitive information from its customers, DickFergusons.com hired ControlScan and subscribed to the Business Secure Plan. Through its unique process, ControlScan will conduct security tests and audits of DickFergusons.com and certify the site's security.

"Privacy and security are the main concerns of consumers," says ControlScan president and CEO Richard Stanton. "Consumers want to do business with companies who take privacy and security seriously. By passing the audits associated with the Business Secure Plan, DickFergusons.com's visitors are reassured that this company is committed to protecting their personal and credit card information and providing a safe online shopping experience."

Once a company passes the security process associated with the Business Secure Plan they receive the Hacker Defended, Privacy Protected and Business Background Reviewed certificates. These certificates are renewed daily, allowing DickFergusons.com's customers to receive independent third-party verification of the site's actual security before they decide to give out sensitive personal data.

About DickFergusons.com

Since 1934 Dick Ferguson's has built its reputation on good service and quality merchandise. Family owned and operated for over six decades, it guarantees customers complete satisfaction will never change. Dick Ferguson's offers a full line of custom tailored suits, coats, trousers and shirts.

About ControlScan

ControlScan provides third party verification and services to identify, measure and prioritize security, privacy, quality, accessibility and compliance risks that exist on corporate Web properties. ControlScan solutions provide the visibility and control necessary to evaluate a company's Web property risk exposure, and to put processes and procedures in place to effectively implement online governance strategies.
