

ControlScan Certifies PCExchange.net As A Safe Shopping Site

In an effort to increase its Internet security, PCExchange.net, the leading refurbishing and liquidation center for name brand computers, today announced that it has become certified by ControlScan.

For Immediate Release

MARIETTA, Ga./EWORLDWIRE/May 19, 2006 --- As a measure to increase privacy, security and to prevent hackers and thieves from accessing sensitive information from its customers, PCExchange.net hired ControlScan and subscribed to the Enterprise Secure Plan. Through its unique process, ControlScan will conduct security tests and audits of PCExchange.net and certify the site's security.

"Privacy and security are the main concerns of consumers," says ControlScan president and CEO Richard Stanton. "Consumers want to do business with companies who take privacy and security seriously. By passing the audits associated with the Enterprise Secure Plan, PCExchange.net's visitors are reassured that this company is committed to protecting their personal and credit card information and providing a safe online shopping experience."

"As information about privacy and security becomes more rampant, consumers are learning that it is not safe to give just any business their personal information. Likewise, businesses owners understand that they must take precautions to protect themselves and customers from these criminals," said PCExchange.net Operations Manager Darin Goss. "By using ControlScan's Enterprise Secure Plan we hope to give both parties the assurance that their transactions are secure."

About PCExchange.net

Since 1998 PCExchange.net, Inc. has made a remarkable impact in the secondary Computer and Laptop markets by offering its customers very competitive pricing on gently used, refurbished and off-lease computers. Computer and laptop buyers can expect to save up to 50 percent and more over competitors prices with PCExchange.net's streamlined low overhead operation. Excellent value, safe secure shopping, same day shipping, reliability and five star customer service is common at PCExchange.net.

About ControlScan

ControlScan provides third party verification and services to identify, measure and prioritize security, privacy, quality, accessibility and compliance risks that exist on corporate Web properties. ControlScan solutions provide the visibility and control necessary to evaluate a company's Web property risk exposure, and to put processes and procedures in place to effectively implement online governance strategies.
