

ControlScan Certifies TourSpecGolf.com As A Safe Shopping Site

In an effort to increase its Internet security, TourSpecGolf.com a high-end golf equipment provider, today announced that it has become certified by ControlScan.

For Immediate Release

MARIETTA, Ga./EWORLDWIRE/June 8, 2006 --- As a measure to increase privacy and security and to prevent hackers and thieves from accessing sensitive information from its customers, TourSpecGolf.com hired ControlScan and subscribed to the Corporate Secure Plan. Through its unique process, ControlScan will conduct security tests and audits of TourSpecGolf.com and certify the site's security.

Once a company passes the security process associated with the Corporate Secure Plan it will receive the Hacker Defended, ID Theft Protected, Privacy Protected and Business Background Reviewed certificates. These certificates are renewed daily, allowing TourSpecGolf.com's customers to receive independent third-party verification of the site's actual security before they decide to give out sensitive personal data.

"As information about privacy and security becomes more rampant, consumers are learning that it is not safe to give just any business their personal information. Likewise, businesses owners understand that they must take precautions to protect themselves and their customers from these criminals," said the owner Christopher Pierson at TourSpecGolf.com. "By using ControlScan's Corporate Secure Plan we hope to give both parties the assurance that their transactions are secure."
