

ControlScan Certifies WeGotSoccer.com As A Safe Shopping Site

In an effort to increase its Internet security, WeGotSoccer.com , the leading online soccer specialty store, today announced that it has become certified by ControlScan.

For Immediate Release

MARIETTA, Ga./EWORLDWIRE/June 9, 2006 --- As a measure to increase privacy and security and to prevent hackers and thieves from accessing sensitive information from its customers, WeGotSoccer.com hired ControlScan and subscribed to the Business Secure Plan. Through its unique process, ControlScan will conduct security tests and audits of WeGotSoccer.com and certify the site's security.

Once a company passes the security process associated with the Business Secure Plan it will receive the Hacker Defended, ID Theft Protected and Business Background Reviewed certificates. These certificates are renewed daily, allowing WeGotSoccer.com's customers to receive independent third-party verification of the site's actual security before they decide to give out sensitive personal data.

“As information about privacy and security becomes more rampant, consumers are learning that it is not safe to give just any business their personal information. Likewise, businesses owners understand that they must take precautions to protect themselves and their customers from these criminals,” said the owner Kevin Fitzgibbon at WeGotSoccer.com. “By using ControlScan's Business Secure Plan we hope to give both parties the assurance that their transactions are secure.”

About WeGotSoccer.com

WeGotSoccer.com is the largest stand alone soccer store in America. It has a vast experience in the team outfitting and soccer retail business. WeGotSoccer.com is now becoming a one-stop shop for all soccer players, coaches and fans.

About ControlScan

ControlScan provides third party verification and services to identify, measure and prioritize security, privacy, quality, accessibility and compliance risks that exist on corporate Web properties. ControlScan solutions provide the visibility and control necessary to evaluate a company's Web property risk exposure, and to put processes and procedures in place to effectively implement online governance strategies.
