

ControlScan Certifies CSHardware.com As A Safe Shopping Site

The leading supplier of goods and materials to the furniture and cabinet making industries announced today that it has become certified by ControlScan.

For Immediate Release

ATLANTA, Ga./EWorldWire/July 25, 2006 --- As a measure to increase privacy and security and to prevent hackers and thieves from accessing sensitive information from its customers, CSHardware.com hired ControlScan and subscribed to the Business Secure Plan. Through their unique process, ControlScan will conduct security tests and audits of CSHardware.com and certify the site's security.

Once a company passes the security process associated with the Business Secure Plan, they receive the Hacker Defended, ID Theft Protected and Business Background Reviewed certificates. These certificates are renewed daily, allowing CSHardware.com's customers to receive independent third-party verification of the site's actual security before they decide to give out sensitive personal data.

"As information about privacy and security becomes more rampant, consumers are learning that it is not safe to give just any business their personal information. Likewise, businesses owners understand that they must take precautions to protect themselves and their customers from these criminals," said Jon Erb, owner of CSHardware.com.

"By using ControlScan's Business Secure Plan, we hope to give both parties the assurance that their transactions are secure."

About Business Secure Plan

ControlScan's security certifications are rapidly becoming the industry standard for privacy protection. The certificates assist in meeting the criteria for mandates in Europe, Japan, Canada, ISO and the USA. By using business plans unlike any other Internet security solution companies, ControlScan is able to custom protect companies and their consumers. As a business is put through the certification process, ControlScan is able to show the company where its weaknesses lie. If a company does not pass the test, ControlScan's experts work with the company to increase its security until they meet the standards. Therefore, customers who see ControlScan certifications on a website can shop with ease, knowing that the business is working towards ensuring consumer safety.

About CSHardware.com

Customer Service Hardware is a supplier of goods and materials to the furniture and cabinet making industries. Our inventory of materials is enough to make any woodworker happy. We inventory a wide range of materials including decorative hardware, fasteners, adhesives, functional hardware and several other complete lines of products commonly found in a woodshop.

About ControlScan

ControlScan provides third party verification and services to identify, measure and prioritize security, privacy, quality, accessibility and compliance risks that exist on corporate web properties. Our solutions provide the visibility and control necessary to evaluate a company's web property risk exposure, and to put processes and procedures in place to effectively implement online governance strategies.
