

Control Scan Certifies Eurotoys.com As A Safe Shopping Site

In an effort to increase its Internet security, Eurotoys.com, the leading distributor of specialty toys from Europe, today announced that it has become certified by ControlScan.

For Immediate Release

ATLANTA/EWORLDWIRE/Aug. 1, 2006 --- As a measure to increase privacy and security and to prevent hackers and thieves from accessing sensitive information from its customers, euroToyShop hired ControlScan and subscribed to the Business Secure Plan. Through its unique process, ControlScan will conduct security tests and audits of euroToyShop and certify the site's security.

Once a company passes the security process associated with the Business Secure Plan it receives the Hacker Defended, Privacy Protected and Business Background Reviewed certificates. These certificates are renewed daily, allowing euroToyShop's customers to receive independent third-party verification of the site's actual security before they decide to give out sensitive personal data.

"As information about privacy and security becomes more rampant, consumers are learning that it is not safe to give just any business their personal information. Likewise, businesses owners understand that they must take precautions to protect themselves and their customers from these criminals," said Director of Technology Randall Hertzler at euroToyShop. "By using ControlScan's Business Secure Plan we hope to give both parties the assurance that their transactions are secure."

About euroToyShop

euroToyShop is an online toy store offering specialty toys imported from a selection of fine European manufacturers such as Bruder, Kathe Kruse, LEGO, Ravensburger, Schleich, Selecta Spielzeug and Siku. Its range of European toys is durable, encourages creativity and helps children with healthy development. More information is available at <http://www.euroToyShop.com>.

About ControlScan

ControlScan provides third-party verification and services to identify, measure and prioritize security, privacy, quality, accessibility and compliance risks that exist on corporate Web properties. Its solutions provide the visibility and control necessary to evaluate a company's Web property risk exposure, and to put processes and procedures in place to effectively implement online governance strategies.
