

Control Scan Certifies KronicVibes.Com as Safe Shopping Site

In an effort to increase its Internet security, KronicVibes.Com, the leading online adult merchandise retailer, today announced that it has become certified by ControlScan.

For Immediate Release

ATLANTA, Ga./EWORLDWIRE/Aug. 10, 2006 --- As a measure to increase privacy and security and to prevent hackers and thieves from accessing sensitive information from its customers, KronicVibes.Com hired ControlScan and subscribed to the Corporate Secure Plan. Through the unique process, ControlScan will conduct security tests and audits of kronicvibes.com and certify the site's security.

Once a company passes the security process associated with the Corporate Secure Plan it receives the Hacker Defended, ID Theft Protected, Privacy Protected and Business Background Reviewed certificates. These certificates are renewed daily, allowing KronicVibes.Com customers to receive independent third-party verification of the site's actual security before they decide to give out sensitive personal data.

"As information about privacy and security becomes more rampant, consumers are learning that it is not safe to give just any business their personal information. Likewise, businesses owners understand that they must take precautions to protect themselves and their customers from these criminals," said the owner Vincent Fabro at KronicVibes.Com. "By using ControlScan's Corporate Secure Plan we hope to give both parties the assurance that their transactions are secure."

About KronicVibes.Com

Kronicvibes.com is an adult toy store that prides itself on excellent customer service. We stock nearly 4,000 of the top adult sex toys and more. It offers a wide variety of merchandise from all the major manufacturers such as toys, lingerie, DVD's and more.

About ControlScan

ControlScan provides third party verification and services to identify, measure and prioritize security, privacy, quality, accessibility and compliance risks that exist on corporate web properties. The company's solutions provide the visibility and control necessary to evaluate a company's web property risk exposure, and to put processes and procedures in place to effectively implement online governance strategies.
